

PANEL KIT for "F" SERIES FAN COIL UNITS

The SpacePak Remote Mount Panel Kit (Model AC-RMK) is an optional accessory that allows ESP-F Series fan coil unit controls to be externally mounted. The electrical panel supplied with the kit is exchanged with the fan coil unit panel. Then using the 10-foot wire harness, the control box can be installed in any suitable location allowing for easy access and servicing.

STANDARD FEATURES

- Corrosion resistant box with durable "E-coat" finish.
- Electrical connection knock-outs located on both sides.
- Eight pre-drilled mounting holes.
- Electrical panel retained with (2) 1/4" hex head nuts.
- All wires color coded with factory terminations.
- 10-foot wire harness 1/2" metallic conduit fitted with 90° connectors at each end.
